Official Declaration of Conformity on General Data Protection Regulation

The General Data Protection Regulation (GDPR) becomes enforceable on May 25th, 2018 and aims to protect the European residents' personal information; all entities that process personal data of European residents, no matter their location, must comply with the new law.

We, SC Sigma Labs SRL, have always paid special attention to our customers and partners' rights, as well as to their security. Personal data protection always represented a top priority, as we regularly invest in infrastructure and security. We closely collaborate with a personal data protection and internet laws expert, to ensure that all activities are in total accordance with these legal requirements. The data we collect and process is completely safe with us! Just as before, all the personal information that you introduce in our platform is and will continue to be your data, as SC Sigma Labs SRL acts only as an authorized agent.

How did we prepare for GDPR?

- We analyzed the way we process personal data, we identified and remedied all the cases in which the new conditions imposed by the regulation weren't met
- We conducted an external audit on our processes, on the way we communicate with our clients and partners, in order to make sure that all the data we process is not exposed to any risks and that the personal information is stored and processed securely, in complete confidentiality
- We made sure that all our employees understand the new rules and that they will pay a special attention to the data they're working with
- We made sure that all the services providers that have access to personal data have also implemented everything that is required in order to comply with the new GDPR rules
- We created internal procedures, and we trained the staff so that the rights of our customers are respected entirely

Here, at SC Sigma Labs SRL, we are continuously preparing to ensure the security of personal data at the highest level, and, at the same time, to be able to prove this each moment. Therefore, we performed an audit of our computing systems that store personal data, and

we are continuously working on improving our security. Likewise, we are prepared to detect at any time security breaches, if it comes to that, so we can promptly inform you. The other service providers that are connected to Modula, which is administered by SC Sigma Labs SRL (HelpScout, Kinsta, FastSpring, EDD, Google Analytics, NinjaForms) they all conform to the General Data Protection Regulation.
